

The Fort Street High School  
**Environmental Council**

## Safety Alert

Dear all,

Members of the SEC are cautioned and reminded to use gloves or protective gear when handling waste material - this includes both general, organic and recyclable waste.

When handling such material, students should always use hand protection in the event that dangerous materials, such as exposed syringes, glass shards or chemical waste is found in the container.

These gloves can be sourced from home or the SEC; the Council does have working gloves on hand which were originally used for gardening. If you wish to use these gloves instead of purchasing them, please ask me, Mr. Pagani or any office staff member.

Regards,

William Vu  
President, Student Environmental Council
